Classroom Happenings

May was an exciting month on our playground! We watched the sparrows build their nests, observed the ants crawling around our sandbox and saw the trees change color as they began to sprout their green leaves. In addition to observing nature, we also made a special gift for our Moms for Mother's Day and listened to books and songs about bugs.

In June, we will be learning about ocean animals. Some activities we will be doing include examining seashells and listening to the book *Ocean Animals From Head to Tail*. Towards the end of the month, we will be getting ready for the 4th of July by doing activities that focus on the colors red, white and blue.

Important Dates

June 1st: Summer Session Begins

Themes for the Month

- Ocean Animals
- Red, White and Blue

Family Connection Activity

Although the closest we can get to the Atlantic Ocean is nearly a 14 hour drive, did you know that you can visit ocean inhabitants in less than an hour's drive from Elkhorn? Milwaukee is home to two aquariums: The Reiman Aquarium at Discovery World (discoveryworld.org) and the 28,000 gallon Pacific Coast Marine Aquarium at the Milwaukee County Zoo (milwaukeezoo.org). If you're willing to take a longer drive, don't forget that Chicago is home to the Shedd Aquarium (sheddaquarium.org), one of the largest aquariums in the world!
