April Recap

This cold month of spring we discussed the importance of recycling and reusing materials such as plastic, paper, and glass. We planted a variety of vegetables that the students took home in hopes of growing a garden of their own. As we learned about the impact deforestation has on wild life, the students worked together and built a forest that is displayed in our foyer. They hope their work reminds every one of the importance of recycling.

May News

This month we hope to research the subject of Archeology. We will look into making pyramids and explore what their purpose was. In our new sand pit, we will do an excavation in hopes of finding lost treasure! As we learn about the Egyptian's, we will try to make our own papyrus.

Reminders

The center will be closed on Memorial Day the 30th of May.

Make sure to get Summer and School-Year '22-'23 contracts turned in; this will help us plan our classes. THANK YOU!

Miss Jennifer will be coming to visit us with the *Library on the GO*.

Our Scholastic Book Fair is May 23rd-27th. If we sell enough, funds from this fair will help support School-Age programming this summer, so make sure to get some books to start your summer reading!

Family Connection

Visit our local library with your child and take a look at their amazing selection of books on history and the incredible discoveries that were made by accident. Or, take an hour to check out the Lake Geneva Museum and see the incredible archaeological findings in our area.
