Lakeland's Little Learners

APRIL 2026

## Hello April!

I hope you all had a nice spring break and were able to enjoy a little extra time with your child (ren). After spring break, the end of the school year is in sight. I look forward to supporting the students through the final stretch of the school year. Continue to communicate with us if there is anything specific your child is working on, so that we can support them in their goals. - Mrs. Casey

## Coming Up...

### Terrariums

Terrariums are enclosed gardens that allow the water to cycle through the dirt and air when exposed to warm sunlight. We will be creating our own classroom terrarium to see what we can grow.

### Ant Farm

Have you ever seen an ant hill and wondered what's deep underneath? Ants live in a colony and work together to build tunnels and collect food. We'll be creating our own ant farm in order to observe how they work together.

### REMINDERS...

- For safety reasons, please do not leave cars running in the parking lot.
- Contact LLL, by schedule day, to request any schedule changes. A calendar can be found on the front bulletin board and website.
- LLL will be closed on May 25th for Memorial Day.
- Contracts have been open for Summer and next school year.

## Creating Connection

**Arbor Day Outing** In honor of Arbor Day, take your child (ren) to a local arboretum to explore the trees and talk about how important trees are for humans and animals. Did you know we have a local arboretum in Delavan, the Paul Lange Arboretum. Pick a day this month to check it out!

**Go Screen Free** In honor of Earth Day, pick a day this month (or once a week) to go screen-free. Use less energy and unplug. Turn off the phones, tablets, and TVs. Enjoy a book, play a board game, make art, do chores, or build legos. Talk to your child about conserving energy and why it is important.

## Special Dates

- ♦ April 22 - Earth Day
- ♦ April 24 - Arbor Day
- ♦ May 4 - Original Works Orders Arrive
- ♦ May 11-14 - Book Fair
- ♦ May 25 - LLL Closed/EASD No School Day

## Last month...

In March, we had a short time together due to spring break and other days off of school, but we still managed to have some fun and get creative! St. Patrick's Day brought lots of fun and excitement. We planted some clovers and watched the roots form in the soil. As the weather warms, we learned about what the direction of the wind can tell you about the weather. We created colorful wind catchers that can be enjoyed at home so the students can help to track the weather of the day!
