### April Recap

We took advantage of the sunny days this month and explored our playground for animal footprints, changes on trees, and a few worms we were able to rescue. It was a lot of fun to work together to create a multi-story character tapestry that is hanging on our wall. To encourage reading, several of our students created story books that they shared with our group. In an effort to further creativity, several of our students took pictures of still life they set up around the room.

### May News

As the weather becomes warmer, we will dig into the subject of Paleontology. Research tells us that this science inspires a wealth of curiosity about ancient life and their origins. We hope to conduct an excavation at our program. Our findings will be recorded and shared with everyone. As we discover origins of species, we will research how the change in the environment impacted their survival.

### Upcoming Events

**Scholastic Book Fair will be at LLL May 13<sup>th</sup>-17<sup>th</sup>, stock up for summer reading!  
All are welcome to come over to the main center and participate.**

### Reminders

Please let us know of your child's absence.  
Wrap-Around and LLL's main center will be closed May 27<sup>th</sup>, Memorial Day.

### Family Connection

Visit the Kenosha Public Museum and discover the incredible variety of dinosaur fossils. The collection takes you through millions of years of history and admission is free! Discuss with your child the incredible mastodons that have been unearthed right here in Wisconsin.
