October Recap

In October, we got to explore the world through maps. We created landforms such as mountains, waterfalls, and volcanoes in different areas of the world. Our creations are being displayed at the Matheson Memorial Library. We enjoyed learning about the highest and lowest parts of our planet. To test their knowledge, the students enjoyed a fun game of our version of Jeopardy.

November News

This beautiful month, we will dive into the waters of our world. It is incredible that more than eighty percent of our oceans have not been mapped, explored, or even seen. We hope to make some new discoveries of our own. We will conduct water density experiments. As we learn about the effects of pollution we will come up with a solution and figure out how an oil spill can be cleaned up. What lives at the bottom of the Amazon River? Why is Lake Erie full of shipwrecks? What mysterious creatures are living in the sea of Cortes? We are excited to try and find out.

Reminders

Fees are due Friday the 4th and 18th of November

Wrap-Around will be closed November 23,24, and 25th.

If you need a good spot for your student(s) on the 23rd or 25th contact the main center for availability.

Please check lost and found for items the students may have left behind at school.

Upcoming Events

Scholastic Book Fair is coming to LLL

November 28/-12/2/22

All are welcome to come over and get some great books!

We offer conferences, they are optional, so if you would like one, please let me know.

Family Connection

Pick a cold and rainy day and visit the incredible underwater world found at the Reiman Aquarium in Milwaukee. There are strange and unique fish from all around the world. Make discoveries together.
